Inspire is not for everyone. Talk to your doctor about risks, benefits and expectations associated with Inspire. Risks associated with the surgical implant procedure may include infection and temporary tongue weakness. In rare cases tongue paresis and atrophy may occur. Some patients may require post implant adjustments to the system's settings in order to improve effectiveness and ease any initial discomfort they may experience. Important safety information and product manuals can be found at [inspiresleep.com/safety-information/](https://www.inspiresleep.com/safety-information/), or call 1-844-OSA-HELP
